Please complete the following enrollment form. Items marked by an (*) are required for processing your enrollment. In order to receive credit for completing this course, you must set up a user account consisting of your email address and a password of your choosing. Your email address and password will serve as your login information, therefore choose a password that is easy to remember.

Email: *	<input type="text" value="Email"/>
Email, Again: *	<input type="text" value="Confirm Email"/>
Password: *	<input type="text" value="Password"/>
	Your password must be at least 6 characters long and contain at least one number.
Re-Enter Password: *	<input type="text" value="Confirm Password"/>
Title:	<input type="text" value=""/>
First Name: *	<input type="text" value="First Name"/>
M.I.:	<input type="text" value="Middle Initial"/>
Last Name: *	<input type="text" value="Last Name"/>

ลงทะเบียนโดยกรอก E-mail address และ ชื่อ-นามสกุล

Are you an NIH Employee? * Yes
 No

If no, institutional affiliation: * College/university

The highest degree you have earned: * Bachelors

Your discipline (please choose all that apply): * Biomedical Research
 Behavioral Research
 Basic Research
 Other

Which of the following best describes your role *

Country * Resident/Clinical Fellow
Postdoctoral Researcher

State * Research Scientist (non-faculty)
Faculty: Tenure-Track
Faculty: Other
Clinical Staff/Private Practice

Introduction

Page 1

Research with human subjects can occasionally result in a dilemma for *investigators*. When the goals of the research are designed to make major contributions to a field, such as improving the understanding of a disease process or determining the efficacy of an intervention, investigators may perceive the outcomes of their studies to be more important than providing protections for individual participants in the research.

Although it is understandable to focus on goals, our society values the rights and welfare of individuals. **It is not considered ethical behavior to use individuals solely as means to an end.**

The importance of demonstrating respect for research participants is reflected in the principles used to define ethical research and the regulations, policies, and guidance that describe the implementation of those principles.
